

# WCA PERISHABLES

WCA MEMBER BUSINESS CARD

proud WCA perishables member

**WCA Perishables is the world's leading network of independent freight forwarders specializing in the handling, transportation, distribution & storage of perishable and temperature sensitive goods.**

The members of WCA Perishables are fully conversant in the special handling and professional, consistent service and transportation of the following; perishable produce, vegetables, fish, flowers, frozen foodstuff, biotech goods, temperature sensitive pharmaceuticals, diagnostics, vaccines, plasma, laboratory products, and more.

WCA Perishable members are able to advise on the most appropriate method of movement to ensure products arrive faster, fresher and with speed and reliability to prolong shelf life. Partners work closely with all types of suppliers and manufacturers to ensure temperatures are not compromised.

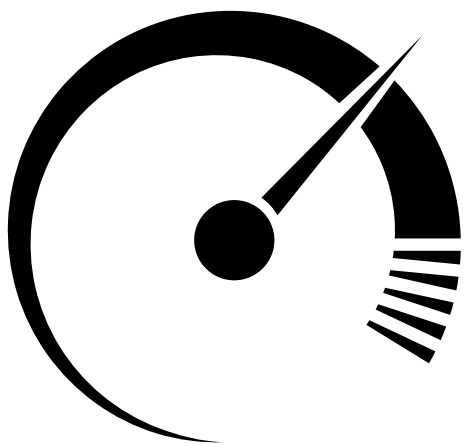

WCA perishable members can provide a full range of services whether for air or for ocean movement. This includes hygienic conditions in handling areas, full refrigeration facilities, temperature-controlled environments and full climate control. All through the quality controlled temperature recording upon acceptance and at destination. Cool trucks, environmentally controlled containers, dry ice and active shipment monitoring make WCA Perishable members the best in the business.
